AI Needs More Opinions From Multiple Experts

When we’re seriously ill, we often seek a second medical opinion. But in AI, we usually stop at the first **best model**—treating it as **the ultimate truth**.

What if it’s wrong?

With **AI-Spectra**, we rethink this. Instead of one model, we use a **council of expert AI models**, each offering a valid perspective. Our visual dashboard shows where **models agree or disagree**—helping users see the full picture.

From One to Many: Building a Council of Equally Accurate Experts

Chernoff Bots - Visualising Experts

Council of Experts, Visualised

Integrating **AI-Spectra** facilitates a **paradigm shift** to informed and transparent decision-making using **multiple expert models**.
